## REPORT OF SCHOOL BOARD.

---

The progress in the schools during the past year was good. Not all the conditions were to our mind, but probably that could not be.

Four teachers were employed, all of some experience, though limited, with one exception. We believe each one worked faithfully in the discharge of her duties.

There were fifty-one scholars registered during the year and three schools were maintained. In the spring there were schools in Nos. 1, 4 and 5. In the fall and winter in Nos. 1, 2 and 4. There were twenty-seven weeks of school divided into two terms, a spring term of eleven weeks and a fall and winter term of sixteen consecutive weeks, except in No. 1, where the sixteen weeks was divided into two terms of eight weeks with a vacation of one week.

The improvement in No. 4 school has been so marked during the tuition of Miss Fitzgerald we make special mention of it. She has the faculty for stimulating and keeping up a great degree of interest and her discipline is very good indeed.

The school in No. 1 gave an entertainment in the winter term, and with the proceeds bought useful articles, including a steel mat for the entry of the schoolhouse, a waste basket, a pencil sharpener, etc., for which they should be commended. It is not the first time in which that school in a like manner has purchased needed articles for their schoolroom.

The register for the year shows a deplorable number of absent and tardy marks, which attest to somebody's unfaithfulness.

New reading books were purchased in the spring, exchanging old books as far as consistent.

New maps were bought for three schools by the advice of the state superintendent, Mr. Morrison.

While the schools are diminishing in number every year the cost does not diminish in the same proportion. The wages of teachers are higher and the cost of the small supplies is not small in the aggregate.

One man who has had much to do with schools for many years says "Providing books for all scholars is all right, but I don't believe in the furnishing the small supplies such as pencils, paper and ink." By this method a factor is lost for training children in economy, which is very much needed in these days.

Undoubtedly if those things were provided by the parents the cost would not be one-half as much per scholar. What costs nothing is not of much value. We believe there are cases where more is wasted than used.
